Summary

Aspiring Software Developer and Computer Science Engineering student with hands-on experience in full-stack web development, AI/ML-driven applications, REST API design, and database-driven systems. Proficient in Java, Python, JavaScript, and Node.js, with a basic understanding of Data Structures, Algorithms, and DBMS. Seeking a software engineering internship to build scalable and efficient solutions.

Professional Experience

AI & ML Intern, Inexoft Technologies Pvt Ltd **May 2026 – Jun 2026**
Kannur, Kerala

- Trained in AI/ML fundamentals covering data management, predictive analytics, queue optimization, resource allocation, and system automation.
- Built the AI-Powered Government Hospital Queue and Resource Management System spanning 4 role-based modules (patient, doctor, nurse, admin).

Freelance Project – Travox Travel Hub (Tourism & Tour Automation Platform) **Jul 2026 – Aug 2026**
travox-rho.vercel.app *Kannur, Kerala*

- Engineered an end-to-end travel platform and lead CRM using Next.js (App Router), Prisma ORM, and MongoDB, handling trip configuration, automated quote generation, and administrative lead tracking.
- Built a multi-step custom trip builder with dynamic routing and vehicle selection, integrating OpenStreetMap (Nominatim) and OSRM APIs to calculate accurate road distances and compute real-time tiered rental quotes.
- Architected an administrative CRM & profit-tracker dashboard with live margin analytics, lead status updates, 1-click WhatsApp quotes, and a full CMS for tour packages, pricing, and reviews.

Web Development Intern, Verveox Technologies **Jun 2025 – Jul 2025**
Kollam, Kerala

- Completed structured training in full-stack web development using HTML, CSS, JavaScript, and Node.js.
- Built interactive web pages, implemented real-time features and authentication with Firebase, and contributed to full-stack application development.

Projects

AI-Based Govt Hospital Smart Queue & Resource Mgmt System | GitHub Repo **May 2026 – Jun 2026**

- Built a Django-based healthcare platform with multi-role dashboards for patients, doctors, nurses, and admins.
- Developed AI models for symptom/trauma triage, predictive diagnostics (ECG, heart failure, cognitive, cardiac risk), and automated treatment planning.
- Implemented smart queue routing, real-time bed tracking, a 24/7 AI chatbot, and a telehealth module. **Tech:** Django, Scikit-learn, Pandas, NumPy, SQLite.

AI-Personalised Learning Management System (LMS) | Mini Project **Dec 2025 – Jan 2026**

- Developed an AI-driven personalized LMS with authentication, course management, and ML-based progress tracking to recommend content based on user behavior.

Skills

Languages: Java, Python, C++, JavaScript

CS Fundamentals: Data Structures & Algorithms, DBMS, Operating Systems, OOP

Web & Backend: React.js, Next.js, Node.js, Django, REST APIs, Tailwind CSS, Firebase, Prisma, MongoDB

Tools, DB & ML: Git, Linux, SQL, Scikit-learn, Pandas

Education

Bachelor of Technology in Computer Science Engineering **Sep 2023 – Present**
Srinivas University *Mangaluru, Karnataka*

- Coursework: Data Structures, Algorithms, DBMS, Operating Systems, Computer Networks, OOP, Web Technologies.

Full-Stack Development Program (Specialization in 4.0 Technologies) **Oct 2023 – Present**
NxtWave CCBP 4.0 Academy *Hyderabad, Telangana (Remote)*

- Focus areas: HTML, CSS, JavaScript, React, Python, SQL, Linux, Backend Development, Deployment.

Additional Information

Languages: English, Malayalam, Hindi.

Certifications: IBM Python for Data Science – IBM Business Intelligence – IBM Hadoop – Certiport Java IT Specialist – IT Specialist Artificial Intelligence – ML using Python (IBM)
